PUBLIC PARTICIPATION

Paul D. Person, 911 W. Cornhill – Asked about the total number of acres of property owned by the City of Cameron and what property is not being utilized. Inquired if the City researched the local aquifer as an alternative source of water. Staff is going to review the studies done in the past when researching water resource alternatives. Stated he wanted the City to get out of the Great Northwest Wholesale Water Commission and explore other options. Inquired whether water rates have increased because of the GNWWC and, if so, doesn't think he should be paying for water he's not getting. Staff responded that the water rates have increased incrementally instead of a large increase all at once. Mr. Person does not want the land behind Wal-Mart to be used for parks.

Doug Schmitz, 7484 SE Frost Rd – Stated that regarding the proposed appreciation picnic for the Department of Corrections, he has had no response from Wal-Mart and it is now a moot point. Relayed information regarding the flood of 1993 when the water plant in St. Joseph was under water and could not produce water for the community.

CONSENT AGENDA

Motion was made by Councilmember Sloan and seconded by Councilmember Feighert to approve the items on the consent agenda:

CITY MANAGER'S REPORT

City Manager Gaugh advised Council that the Solid Waste Committee met on May 31st to discuss the upcoming solid waste contract. The Committee recommended pursuing a new agreement with R&W Container and negotiating changes to make the program more cost effective and efficient. The contract will come back to Council for approval at a later date.

There are no new developments with eTruck in the Business Park. The company will be moving into the facility any time now. City Manager Gaugh advised he visited eTruck's location in Austin, Texas last week.

The Alert Phase for water restrictions is still in place. Many of our neighboring communities have also initiated water restrictions due to the drought. Should the City need to move to the Emergency Phase of the Water Conservation Ordinance, the Missouri Department of Natural Resources will need to inspect the temporary pumping line after we get it installed. There is some rain forecast in the near future but it will take several inches to put us in decent shape.

No major changes on the GNWWC project. The completion date is still projected to be mid to late 2020.

The Park Board will be available to have a joint meeting/work session with the Council after their regular meeting on June 28th if that works for Council.

Inquired if Council would like to have the first regularly scheduled Council Meeting in July on the 2nd or if they want to consider canceling it due to the holiday and a short agenda at this time. Council agreed to cancel the July 2nd meeting. The next regularly scheduled meeting will be July 16th.

Mayor Breckenridge requested City Manager Gaugh arrange a tour of downtown Chillicothe for Council, EDOC and staff to research a successful redevelopment project.
