City Manager Report

To: Mayor and City Council

From: Steve Rasmussen, City Manager

Date: January 17, 2023

Re: Manager's Report

GNWWC. The Great Northwest Wholesale Water Commission staff met with the USDA Rural Development staff this last week. We discussed the status of construction and particularly addressed their concerns about change orders. We satisfactorily answered their concerns and we are on track with the continued construction.

Capital Improvement Plan. I will place at your seats a preliminary summary of what a Capital Improvement Plan might look like. Council has talked about this and we will discuss what the budget implications of this might be for Council to keep in mind for next year's budget.

Griffin Road. Griffin Road is our top priority for road construction this spring. We have a timeline and the budget to complete this paving project by the end of May. We will show this timeline at the Council meeting for Council and the Public.

Sidewalk Connectivity Program. Council has asked about the sidewalk program and staff has done some preliminary work on this. We will bring it back to Council for review once the Griffin Road project is further along.

Council Pictures. "Pride and Progress" is publishing this year's edition soon and they ask for us to have our input to them by the end of January. So please come prepared to have your picture taken for them before the meeting unless you are happy with your last year's picture.
